Dr. Dyrszka is a founding member of *Concerned Health Professionals of NY* which organized health professionals to raise concerns about the health effects of gas drilling in New York. The efforts of health professionals along with other environmental activists, resulted in a temporary moratorium on fracking throughout New York State. She is also an active member of Physicians, Scientists and Engineers for Healthy Energy, an organization that provides the public with much needed independent scientific research and information on fracking and healthy energy alternatives.
