

About Us

Ban Michigan Fracking formed in November 2011 to educate, advocate and organize to ban fracking and raise awareness of the dangers of gas drilling to the state's economy, to the environment and to the health and safety of its people. We are a grassroots group dedicated to taking direct action.

We formed **Ban Michigan Fracking** in response to the recent co-opting of the ban movement in Michigan: the emergence of a coalition by so-called environmental groups working with legislators to impose a sham fracking advisory panel and study on fracking carried out by state agencies, with similar mandates to the fatally-biased panel and study in New York state.

We are a principled community of individuals who will never waver in our support for a statewide ban. Come join us and organize in your community.
